EDUCATION

Embedded Systems Engineering Degree

Polytech Lille

📅 2022–Present

📍 Lille, France

Preparatory Classes (TSI track)

CPGE Salmane Al Farissi

📅 2020–2022

📍 Salé, Morocco

High School Diploma in Electrical Sciences and Technologies

Lycée Moulay Abdellah

📅 2019–2020

📍 Sidi Kacem, Morocco

TECHNICAL SKILLS

- **Languages & Tools:** C/C++, Python, MATLAB, SQL, Git, JIRA, AWS, MBSE.
- **Frameworks & Systems:** Node-RED, ROS2, FreeRTOS, Django, Linux, Windows
- **Databases & Protocols:** MySQL, PostgreSQL, InfluxDB, TCP/IP, MQTT, MODBUS
- **Systems Engineering:** System specifications, architecture, V&V, fundamentals of safety and security for critical systems.

SOFT SKILLS

- Autonomy
- Teamwork
- Initiative
- Proactivity
- Problem-solving
- Communication

LANGUAGES

French (Fluent)
English (Professional)
Arabic (Fluent)
German (Beginner)

EXPERIENCE

Junior Connectivity Systems Engineer

AIRBUS PROTECT

📅 Oct–Feb 2026

📍 Toulouse

- **System architecture:** Contributed to the design of connectivity architectures for critical aeronautical systems.
- **Functional analysis:** Drafted system and technical specifications, requirements gathering.
- **Project follow-up:** Involvement in end-to-end projects in a demanding industrial environment.

AIRBUS
PROTECT

Developer Intern / Data Analyst

AIRBUS

📅 Feb–Aug 2025

📍 Toulouse

- **Functional analysis and specifications:** Requirements gathering with electrical systems installation design teams for harness simulation.
- **End-to-end application development:** Designed a management application for A320 electrical systems and harnesses.
- **Team collaboration:** Worked with multidisciplinary teams to ensure project quality.

AIRBUS

Connectivity Engineering Intern

CETIM

📅 Apr–Aug 2024

📍 St-Étienne

- **Condition-based preventive maintenance:** Sensor installation and real-time data integration into CMMS to optimize maintenance.
- **Local network setup:** Network configuration to connect lab machines and transfer files via PowerShell and task schedulers.
- **Electrical data management:** Collection and monitoring using InfluxDB, Node-RED, and Grafana.

cetim

Project Manager

PULCE - Polytech Lille

📅 Feb 2023–Feb 2024

📍 Lille

- Client/technical team interface on industrial projects.
- Contributed to the success and delivery of multiple projects.
